PROFESSIONAL SUMMARY

Software Developer with 2+ years of experience in backend development, application development, automation, and database operations. Proficient in Java, Python, C++, Spring Boot, FastAPI, REST APIs, and SQL. Experienced in developing backend services, microservices, automation applications, and high-volume batch processing solutions. Strong understanding of object-oriented programming, data structures, algorithms, database management, and exception handling. Familiar with Angular, AWS cloud fundamentals, Linux, Docker, and software development best practices.

TECHNICAL SKILLS

Programming Languages	Java, Python, C++, C, JavaScript, SQL
Java Technologies	Core Java, OOP, Collections Framework, Generics, Exception Handling, Multithreading, JDBC, Spring Boot, Spring MVC, Spring Data JPA
Backend Development	FastAPI, REST APIs, WebSockets, Microservices, API Development, JSON, Swagger/OpenAPI
C++	OOP, STL, Containers, Algorithms, Iterators, Exception Handling, Batch Processing
Frontend Development	Angular, JavaScript, HTML5, CSS3
Databases	Oracle, MySQL, Cassandra, SQL, JDBC, Database Management, SQL Optimization
Cloud and DevOps	AWS Cloud Fundamentals, Docker, Linux, Git, GitHub
Testing	JUnit, Mockito, Postman, API Testing
Core Concepts	Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Transaction Management, Debugging, Object-Oriented Design

PROFESSIONAL EXPERIENCE

Software Developer — Tata Consultancy Services Sep 2024 – Present

Client: Verizon

- Developed a billing reconciliation component to identify non-usage-generating accounts and generate accurate bill summary records, achieving 100% account reconciliation.
- Performed Rate Regression and EOC (End-of-Cycle) Regression to validate rating, usage, allowance, overage, and billing scenarios across production workflows.
- Designed and developed a Python-based Rate Regression automation application from scratch using FastAPI, REST APIs, and WebSockets, providing a user-friendly frontend for regression execution and real-time execution log streaming.
- Implemented per-record exception handling during high-volume batch processing to gracefully handle unique constraint violations and prevent failures in the overall execution workflow.
- Improved batch-processing reliability by implementing defensive transaction handling for duplicate rate-charge records, allowing overage account processing to continue without interruption.

PROJECTS

ODC Seat Management System

- Developed RESTful APIs using Java and Spring Boot microservices for seat booking, availability tracking, and user management.

- Implemented CRUD operations and relational database persistence using MySQL and Spring Data JPA.
- Documented and tested REST APIs using Swagger/OpenAPI and Postman.

Weather Forecasting Web Application

- Developed a responsive weather forecasting application using JavaScript and external API integration to retrieve and display weather data.
- Implemented dynamic UI updates and responsive layouts using HTML, CSS, and JavaScript.

  Technologies: HTML, CSS, JavaScript, REST APIs.

EDUCATION

Indian Institute of Information Technology, Guwahati 2020 – 2024

Bachelor of Technology in Electronics and Communication Engineering CGPA: 7.45

Sri Chaitanya Junior College 2018 – 2020

MPC, Board of Intermediate Education Percentage: 91.9%

CERTIFICATIONS

- **Claude Certified Developer - Foundations**
